-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 31 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 and 9-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kleiner (4,976,740; cited by Applicant).

Kleiner teaches that the claimed processes of implanting a femoral head resurfacing component and implanting a conventional total hip arthroplasty, which includes a primary hip stem and an acetabular component, are known (see, e.g. col. 1, lines 24-33 and col. 3, lines 21-23, 29-31 and 38-42). Moreover, Kleiner recognizes the advantage of first utilizing a resurfacing component and later utilizing a conventional total hip arthroplasty if necessary (see, e.g., col. 3, lines 38-42). Kleiner does not explicitly name first, second, third and fourth procedures, for example, or explicitly specify that components that have not failed can remain in place. However, it would have been obvious to one having ordinary skill in the art (e.g. an orthopedic surgeon) to have utilized the least invasive procedure that addresses the deficiency and not engage in unnecessary surgery where revision of a component has not become necessary, to minimize surgical procedures and risks to the patient. The structure set forth in various dependent claims has not been given patentable weight since the pending claims are drawn to a method and the noted structure does not affect the steps of the method.

***Response to Arguments***

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
